The Devastating Health Impacts of Oil & Gas

October 6, 2025

Here is yet another reason to stop using fossil fuels. Fossil fuels are destroying not only the climate, but also our health. The health impacts of using oil and gas are devastating—and expensive. Research performed at University College London and the Stockholm Environment Institute looked at health issues caused by the oil and gas supply chain, from exploration to end use. The highest number of →

The Dark Side of AI

August 18, 2025

There is a dark side of AI. At a time when we are trying to mitigate climate crisis, a dramatic increase in AI and ChatGPT data centers are contributing heavily →

Community Resilience to Climate Change

August 9, 2025

—a guest post by Dana Marks, member of the Media Environmental Advisory Council At our last Media Borough Environmental Advisory Committee (EAC) meeting, the main topic of discussion was the →

Biodiversity & Climate Crisis–Intricately Linked

June 30, 2025

Did you know that biodiversity and climate crisis are intricately connected? The UN calls biodiversity our strongest natural defense against climate crisis. →
